

Great Lakes Recovery Centers is a 501(c)(3) organization that provides behavioral health services, including, mental health services, residential and outpatient substance abuse programming, prisoner re-entry services, trauma assessments, prevention services, peer recovery and more.

GLRC Mission

to empower recovery through hope and change

Core Values

We value:

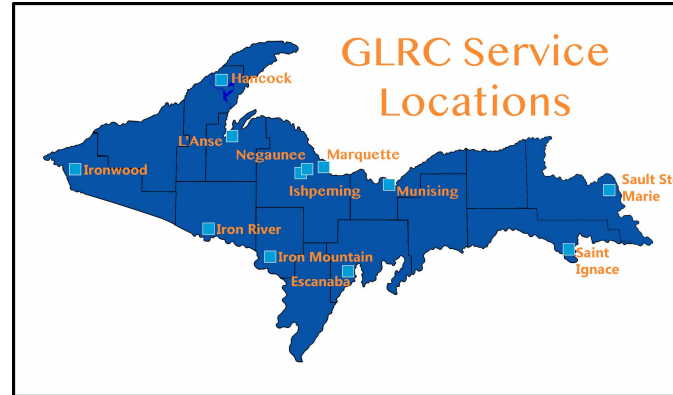

- caring, respect, and empathy for all persons
- a commitment to our clients' recovery
- a strength-based environment for ourselves and our clients
- dependable, trust-based relationships
- service to our communities
- the quality of life through relationships
- a strong and dependable work ethic

Great Lakes Recovery Centers is a non-profit, non-denominational, 501 (c)(3) corporation. Funding comes from a variety of sources. GLRC is a partner agency with the United Way of the Eastern Upper Peninsula and the United Way of Marquette County

Locations

GLRC offers a variety of behavioral health services in many communities across the Upper Peninsula.

For more information about the services at any of our locations, call the Access Center at (855) 906-4572 or (906) 228-9696.

Behavioral Health Services

Child & Adolescent Psychiatric Specialty Clinic

Creating Healthy Communities One Person at a Time

Child & Adolescent Psychiatric Specialty Clinic

Adverse Childhood Experiences

Great Lakes Recovery Centers (GLRC) established the Child & Adolescent Psychiatric Specialty Clinic to help address the unmet need for psychiatric mental health services for children and adolescents. GLRC has partnered with Pine Rest Christian Mental Health Services to provide psychiatric oversight. Effectively addressing adverse childhood experiences and mental health issues is vital for children so they can continue to grow and reach their full potential. GLRC's philosophy for treating behavioral health needs is to assist individuals and families in finding their unique pathway to healing and understanding that no two individuals are the same. The Child & Adolescent Psychiatric Specialty Clinic will help individuals utilize many different pathways to find their own personal path to healing.

Population

The target population for the Child & Adolescent Psychiatric Specialty Clinic includes those children, ages five through eighteen, dealing with mild to moderate mental health issues. Consideration is given for more adverse conditions through our screening protocols.

Availability

The Child & Adolescent Psychiatric Specialty Clinic is located at 97 S. 4th Street, Suite A in Ishpeming and is open Monday through Friday from 9 to 5 for scheduling, questions, and medication refills.

Providers

The Child & Adolescent Psychiatric Specialty Clinic is staffed by Melissa Copenhaver. Melissa is a licensed family nurse practitioner (F-NP), a licensed master level social worker (LMSW), and certified in Trauma-Focused Cognitive Behavioral Therapy (TF-CBT). Dr. Jayanthi Peters also serves the clinic as a consulting child psychiatrist through Pine Rest Christian Mental Health Services.

Services

Services available through the Child & Adolescent Psychiatric Specialty Clinic include:

- Medication Management
- Parent Education
- Psychiatric Evaluations
- Collaboration with community providers and coordination of care

Additional access to expanded child and adolescent psychiatric services is provided via telehealth through Pine Rest Christian Mental Health Services. These services include:

- Consultation
- Enhanced Evaluation
- Pharmacological Support

The initial assessment, or first session, is scheduled as an in-person appointment. Subsequent visits may be scheduled as telehealth appointments to help reduce travel barriers.

Adverse Childhood Experiences (ACEs) affect individuals into adulthood, resulting in higher risk for various health problems. Once we identify that a child is experiencing ACEs, we can connect them with age specific resources needed to prevent adverse effects or promote healing.

Neuroscientific research is overwhelming regarding the lifelong impact of unaddressed childhood adversity and mental health issues. ACEs are common and highly interrelated. They do not distinguish between gender, geography, or economic status.
